*Hand-drawn schematic diagram of a medical device, likely a catheter, inserted into a heart. The heart is shown in cross-section with internal structures. A long tube (catheter) is inserted into the heart, with a side branch (10) connected to the ventricle. The main tube has a distal tip (400) and a side opening (45). Labels 15, 17, 5, and 10 point to various components of the device and heart anatomy.*
